Hanging Out The Shingle

resource11.com is Under Construction

Congratulations, Webmaster!

Thank you for purchasing a MindSpring Web Hosting Site. MindSpring provides many valuable tools to help you develop and manage your web site efficiently. These tools are provided online in the Hosting Control Panel.

MindSpring's Hosting Control Panel gives you hands-on access to your MindSpring Web Hosting Site with (1) tools that help you administrate, design, or upgrade your site, (2) information about services that are available to you as a Hosting Site owner, (3) access to your account options, (4) site statistics and (5) online help.

The Control Panel is a web page, so you will need to access it through a web browser. The URL is https://control.business.mindspring.com. To log in, enter your Web Hosting User ID (begins with wfp) and Password, then click on the Log In button. Both your User ID and Password can be found on the Welcome letter that accompanied your Web Hosting Starter Kit.

Thank you again,
The MindSpring Biz Team
